

Qualifications Summary

Innovative and technically minded individual with certification in full-stack web development as well as hands-on experience in designing and developing applications by leveraging technical expertise. Well-prepared to contribute knowledge, skills, and technical project management experience to achieve set objectives and desired results. Aspiring to gain a challenging position as a Frontend Developer, Software Engineer, or Full Stack Developer within a high-profile organization that offers a genuine opportunity for progression.

Application Development

- ♦ Proven success in developing a Mern Stack Application, E-commerce application, and a weather dashboard.
- ♦ Capable of translating designs and wireframes into markup using modern React, HTML, and CSS to build responsive websites.

Project Management

- ♦ Adept at devising plans and structuring processes to streamline and continue project functions.
- ♦ Instrumental in monitoring all activities to guarantee project completion within timelines and budget.

Software Engineering

- ♦ Experienced in liaising and working with a team, back-end developers, and other stakeholders to propose new features of applications.
- ♦ Possess a strong understanding of cross-browser compatibility and general web functions and standards.

Key Strengths

- ♦ Highly skilled in HTML5, CSS, JavaScript, Node.js, React, Express.js, MySQL, MongoDB, and Git.
- ♦ Detail oriented individual with excellent problem-solving, multitasking, team coordination, and interpersonal skills.

Technical Proficiencies

HTML5 | CSS | Bootstrap | JavaScript | jQuery | Debugging | Responsive Design | MySQL | MongoDB | Express.js | React.js | GraphQL | Node.js | GitHub/Gitlab

Key Projects

Rate My Portfolio

2022

[GitHub](#) [Deployed](#)

Developed a Mern Stack Application in coordination with five team members, enabling users to create accounts, add their portfolios, and receive/give feedback to other users.

- Expertly built GraphQL queries and mutations in the back end as well as designed models and schemas for the user, portfolio, feedback, and rating.
- Leveraged technical expertise while adding feedback and rating features to the application. Implemented GraphQL queries and mutations as well as users' authentication in the front end.
- Developed the Mern Stack Application by adeptly using React, Node, MongoDB, Tailwind CSS, Express.js, JSON Web Tokens, and GraphQL.

Shady MarketPlace

2021

[Repository](#) [Deployed](#)

Played a key role within a team of five members and successfully built an E-commerce application allowing users to create a buyer or seller account as well as add, remove, and buy products.

- Built the application using JavaScript, Bootstrap, Express-handlebars, Express.js, Express-session, Sequelize, MySQL, and Stripe.
- Ensured responsive user interface by employing bootstrap as well as added checkout feature in the front end.
- Enhanced user experience by creating innovative models and REST APIs for order, product, & category selection.

Experience

University of California, San Diego, California

Sep 2021 – Mar 2022

Full Stack Developer

- Approached all coding challenges using pair programming.
- Utilized agile software development and Git workflow in all projects.
- Hands-on experience with client-side and server sides.
- Completed all curriculum coursework such as HTML5, CSS, Bootstrap, JavaScript, React, Node, Express, MongoDB, and MySQL.

Education

Certificate in Full Stack Web Development

Sep 2021 – Mar 2022

University of California, San Diego, CA
