PROFESSIONAL SUMMARY

Full Stack Developer with a background in Law and Political Science. Pursued Full Stack Certificate at the University of California, San Diego. Acquired skills in HTML5, CSS, JavaScript, Node.js, Express.js, React, GraphQL, MySQL, MongoDB, and Git Workflow. Problem-solving ability, fast learner, detail-oriented with the ability to work in stressful situations. Able to develop real-world projects from conception. Looking to bring my attention to detail and technical skills to a company to grow and become a valuable asset.

SKILLS

HTML5, CSS, Bootstrap, JavaScript, jQuery, Debugging, Responsive design, MySQL, MongoDB, Express.js, React.js, GraphQL, Node.js, GitHub/Gitlab

PROJECTS

Rate My Portfolio

Repository: <https://github.com/hekmatsalehi/rate-my-portfolio>

Deployed: <https://floating-fjord-17758.herokuapp.com>

- Designed and developed a Mern Stack Application with a team of 5. It is a platform where users can create account, add their portfolio, receive feedback, and give feedback and rating to other users.
- Implemented the add feedback and add rating feature, GraphQL queries and mutations, and users authentication in the front end.
- Created models and schemas for user, portfolio, feedback and rating, and built GraphQL queries and mutations in the back end.
- Used React, Node, Express.js, MongoDB, Tailwind CSS, JSON Web Tokens, and GraphQL.

Shady MarketPlace

Repository: <https://github.com/DavisRansom/E-Commerce-Marketplace>

Deployed: <https://e-commerce-store-w-stripe-2022.herokuapp.com>

- Built an E-commerce application with a group of 5 to serve buyers and sellers. The Application allows the user to create a buyer or seller account. Sellers can add and remove their products, and buyers can buy their desired products.
- Created models and RESTful APIs for order, product, and category in the backend. Implemented bootstrap for responsive User Interface and added checkout feature in the front end.
- Used JavaScript, Bootstrap, Express.js, Express-handlebars, Express-session, Sequelize, MySQL, and Stripe.

Weather Dashboard

Repository: <https://github.com/hekmatsalehi/weather-dashboard>

Deployed: <https://hekmatsalehi.github.io/weather-dashboard>

- Shows the weather forecast of the US cities and saves the data to localStorage.
- Interact with the open weather APIs and collect the required data
- Used HTML, CSS, JavaScript, and APIs
